THE FOURTH GENERAL ASSEMBLY,

Recognizing the current situation between Ukraine and Russia we as placeholder organizations must take action,

Alarmed by Russia's decision to attack Ukraine and break international law and charters,

Expressing our anger responsibly, we put sanctions on different things like products of Russia where they provided oil, etc even if they would affect all of us around the world,

Recalling mass arguments and disagreements all around the world as both Ukraine and Russia are providers of different things to the world,

Deeply disturbed by Russia's action towards the rest of the world and Ukraine has led us no choice but to put sanctions everywhere,

Acknowledging that Russia can retaliate with full force with allies still with Russia,

Taking into account that Russia may retaliate we should be ready for what they throw at us to NATO to UN the world,
